The following table summarizes the major variants and approximate strike dates for Maria Theresia Talers struck with date 1780. - Rarity: C=very common, 1-7: somewhat rare to extremely rare, with 6:up to 10 specimen known to exist; 7:less than 5 specimen known to exist.
- There may always be deviations from the generic description. For example, a common characteristic of reverse type C is that the eagle has 1-3-1 tail feathers; however, variants with 1-2-1 tail feathers are known as well.
